**Project Abstract**

**Title of Project : Food Donation App**

**Technology used :**
Front End : XML
Back End :Java, Firebase
Other : If required

**Name of the group members and PRN**

1.Name : Anurag Mahada

  PRN : 20210801070

2.Name : Sayali Bhamare

  PRN : 2021080114

3.Name : Abhishek Kokate

  PRN : 20210801068

# Abstract

First Step capstone project objective is to handle donations and connect the donators with the nearest/appropriate needy person through a social mobile application. The application handles different services such as the reviews of the searched needy person and displays their contacts and their location.

The application allows users to create a profile for themselves and then information about a certain family that needs help. This profile will be shown to donators who are looking for someone to donate to. Mainly only information is exchanged. The donators are able to post/see reviews About other people's profiles.

This application is aimed to help the Moroccan society and create a sense of solidarity through modern techniques. The social implications it will have after being launched will certainly aim at closing the gap in terms of quality of life for the less fortunate citizens.
